

CHE 230: Essentials of Organic Chemistry

An organic chemistry one-semester introductory study of structure, bonding, functional groups, and reactions of organic compounds. The application and appreciation of organic chemistry in medicine, biology, and our daily lives will be studied. This course was designed for biology and health science majors and is not appropriate for a CHE 231/232 substitution for pre-professional students interested in veterinary science, medicine, dentistry, physician assistant, or pharmacy as their organic chemistry preparation. This course could serve as an introduction to organic chemistry for pre-professional students. Three lecture per week and one hour of recitation per week.

Credits: Credits 3

Prerequisites:

Prerequisites
